retrieving financial account data for the user, wherein the financial account data is associated with personal data related to the user; and

selecting at least one of a set of questions to display to the user based on the financial account data so that the set of questions are personal to the user based on the personal data of the user, rather than based solely on topics selected by the user, together with the other limitations of the independent claims.

Art Unit: 2164

logic, executed by the processor and communicatively coupled to the first set of data and the second set of data, the logic to receive a request from a user to access the frequently asked questions (FAQ) page, to retrieve from the second set of data the account data for the user, and to select a group of questions from the first set of data and associated answers from the third set of data to display to the user based on the financial account data for the user, so that the displayed group of questions are personal to the user based on the personal data of the user, together with the other limitations of the independent claims.
